Subtraction Involving Mixed Numbers

Bell Work – SE   **Math 4**

Review: Subtraction Fractions with Like Denominators

$$\frac{3}{8} - \frac{1}{8} =$$

$$\frac{6}{12} - \frac{4}{12} =$$

Review: Inverse Operations – Fill in the Blanks

The inverse of addition is _____.

The inverse of subtraction is _____.

$$\frac{1}{5} + \frac{2}{5} = \underline{\quad\quad} \quad so \quad \underline{\quad\quad} - \frac{1}{5} = \frac{2}{5}$$

$$\frac{6}{7} - \frac{2}{7} = \underline{\quad\quad} \quad so \quad \underline{\quad\quad} + \frac{2}{7} = \frac{6}{7}$$

Sarah ate $\frac{3}{4}$ of a bag of chips at lunch. After school, she ate $\frac{1}{4}$ of the same bag of chips. What fraction represents the total amount of chips Sarah ate?
